HUIT GÉNÉRATIONS DE MANUFACTURIERS

8 GENERATIONS OF MANUFACTURERS

Since 1808, the year in which Laurent Vian and Charles Tiran set up their wool mill on the banks of the Sorgue River in Vaucluse, eight generations of uninterrupted family tradition have carried on the wool master's trade at the BRUN DE VIAN-TIRAN manufacture.

UNE PRODUCTION FRANÇAISE POUR UNE QUALITÉ PARFAITE

A FRENCH PRODUCTION FOR A PERFECT QUALITY

Today BRUN DE VIAN-TIRAN still carries out all the natural fibre processing operations in Isle-sur-Sorgue: carding, spinning, weaving, finishing (milling, teaseling...) and making up.

SPÉCIALISTE DES FIBRES NATURELLES

SPECIALIST IN NATURAL FIBRES

Inventor of the 100 % Mohair blanket in 1962, today BRUN DE VIAN-TIRAN creates blankets and throws in Peruvian and Bolivian Alpaca and Llama, in Iranian, Chinese and Mongolian Cashmere, in Yak, in Asian Camel, in Merino from France and from Australia...

In the South of France, seven years of research enabled BRUN DE VIAN-TIRAN to find the ancient breed of Merino d'Arles Antique®, producing the finest and the softest wool in Europe. The collection named "Camargue" highlights this wool.

First producer of woollen duvets in France, Brun de Vian-Tiran, French company, also produces duvets, mattress-topper and pillows made of natural fibres.

Une Entreprise du Patrimoine Vivant

UNE COUVERTURE, UNE COUETTE POUR CHAQUE SAISON

A BLANKET, A DUVET FOR EACH SEASON

For a perfect comfort, the blanket and/or the duvet must be adapted to the season: cold or mild winter, dry or humid summer... The Brun de Vian-Tiran Guide will help you to choose the best-adapted product to your particular needs.

You will also discover our throws, the perfect complement of the blanket or the duvet, to bring more warmth.

UN PLAID POUR TOUTES LES ENVIES

A THROW, FOR ALL YOUR DESIRES

Fibres, colors, patterns... Brun de Vian-Tiran has created a generous collection of throws, the decoration accessory to match your interior design.

UNE ÉCHARPE, UN CHÂLE POUR CHACUN

A SCARF, A SHAWL FOR EACH AND EVERYONE

Brun de Vian-Tiran is an exceptional collection of scarves and shawls, made of wonderful fibres, to surround you with well-being and softness anywhere you are.

CONSEILS D'ENTRETIEN CARE INSTRUCTIONS

All our products can be dry-cleaned. Under normal conditions of use, a blanket or a duvet needs no more than one cleaning per year, as the natural fibres do not attract or retain dust, and only slightly absorb greasy substances.

Washable BRUN DE VIAN-TIRAN articles: please see inside this guide.

COUVERTURE DE LAINE & SANTÉ : LES FIBRES NATURELLES SONT IRREMPLAÇABLES

WOOLLEN BLANKETS & HEALTH: NATURAL FIBRES ARE IRREPLACEABLE

EXTRACTS FROM: Practical synthesis record "Australian wool blanket and health", Annual Congress of the International Wool Textile Organisation, May 2004, by Doctor Saldmann.

HUMIDITY REGULATION: "Scientific tests have proved that wool is superior to all other commonly-used materials in its ability to eliminate excessive humidity."

TEMPERATURE REGULATION: "Unlike duvet, cotton and synthetics, wool (...) is able to provide warmth in a cold environment and coolness when it is hot."

ALLERGIES: "Professor Pascal Demoly, from the Respiratory Diseases Service of the Montpellier Hospital (...) pointed out that there is no documented case of genuine wool allergy (...) even among exposed populations such as workers in the wool industry". "The use of woollen blankets (...) is a normal step in the elimination of dust-mites: easy care and handling, dry-cleaning."

FIRE: Thanks to its natural water content (17%), wool is a "natural fire retardant." "No other material adapts to as many conditions, nor combines as many qualities."

RECHERCHE DE FIBRES NATURELLES

IN QUEST OF NATURAL FIBRES

We buy the world's most noble natural fibres directly from the source, on the five continents.

No artificial or synthetic fibre matches wool for the comfort and feeling of well-being given by a fine blanket and a duvet of good quality.

CARDAGE

CARDING

Carding aims at separating the fibres in order to obtain a regular veil. The fibres recover their original bulk and aeration.

FILATURE ET TISSAGE

SPINNING & WEAVING

We spin and weave our blankets, throws, scarves and shawls ourselves. No non-woven technology (knitting, needling) is sufficiently well adapted to the requirements for stability and long use of a fine fabric.

FOULAGE DE L'ETOFFE

FULLING THE TISSUE

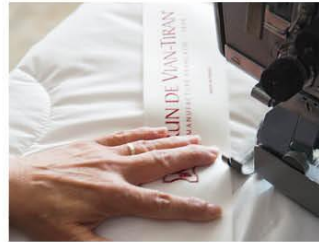

We have been specialists in tissue fulling for over two centuries.

No non-milled fabric can provide the dimensional stability and the feel necessary for a high quality item.

GRATTAGE AU CHARDON

TEASEL RAISING

Our fabrics are teasel-raised. No technology has yet equaled teaseling in bringing out the fleeciness of an item.

LA NAPPE DE LA COUETTE

FILLING THE DUVET

The filling of the duvet is obtained by spreading successive layers of fibre veil, obtained after carding.

PIQUAGE DE LA COUETTE

STITCHING THE DUVET

Every duvet and mattress-topper is produced individually. Therefore the tension of the cover and the stitching are closely looked after by the operator. The stitching creates precise patterns. All the sewing is done by lock stitches, stopped in order to hold durably.

CONFECTION ET FINITION

FINISHING & MAKING UP

The blankets' ribbons and the duvets' bias binding are sewn on with knot-stitch, a stitch that doesn't run. The blanket corners are finished by hand.

The trims make no compromise in longevity, as they are the great protector of your blanket and the final signature of Brun de Vian-Tiran's quality. The finishing complies with the Brun de Vian-Tiran manufacture's requirements. Production is 100 % carried out in our facilities in France.

VIRGIN WOOLS OF THE WORLD

COMFORT & WELL-BEING

Throughout the world, Brun de Vian-Tiran selects wools whose combined qualities will ensure your well-being: New Zealand for softness, Australia for fineness and yet more softness, South America for wear ability, France for warmth, lightness, bulk and air circulation.

VIRGIN EWE & FAMB WOOLS

FEEL & LIGHTNESS

The softness of first-shear lambswool from South America, New Zealand, Australia and England, selected by Brun de Vian-Tiran.

FRENCH VIRGIN WOOLS

COSY COMFORT

Brun de Vian-Tiran has worked with French wools since 1808, in particular with the local wools from the Arles area, nearby Isle-sur-Sorgue. French wools have unique features of volume, particularly well-adapted to cosy products such as duvets, wool eiderdowns, and mattress covers.

MERINO OF THE WORLD

FINENESS & SOFTNESS

Originally coming from Spain, then adapted to the different climates of Europe, Australian, New-Zealand and America (they were exported to North America by Christopher Columbus in his second voyage), Merino sheep give the softest and finest of all wools. Brun de Vian-Tiran selects and blends Merino from all over the world.

MÉRINOS D'ARLES ANTIQUE®

A RETURN TO OUR ROOTS

We rediscovered this pure French Merino Wool which came from the initial cross-breeding of sheep from Arles with pure Merino imported from Spain by Louis XVI. This wool has retained all of the characteristics and fineness of the original Merino breed and

their wool is as fine as Cashmere and indisputably the most beautiful wool produced in France. Our ancestors skillfully fashioned this wool in their XIX century mill and solely Brun de Vian-Tiran continues.

MOHAIR

LIGHT, TASTEFUL AND SENSUAL

The hair of the Angora goat gets its name from the Ankara region in Turkey. Louis Brun created the first Mohair blanket in France in 1962. We select Mohair from farms in South Africa, Texas and from Turkey, its country of origin. This particularly long, lustrous fibre is famous for its exceptional qualities of warmth, lightness and luster, making it a blanket for all seasons. Its shiny, undulating surface brings out the most vibrant colours attainable.

CAMEL & BABY CAMEL

AN INVITATION TO TRAVEL

The Camel used by Brun de Vian-Tiran is the *Camelus bactrianus*, or two-humped Camel, used by the Tartars, the Mongols and the Chinese, and described in Marco Polo's writings on his travels. We select the finest fibres and remove the coarser outer

hairs, to obtain the foamy feel typical to our Camel hair blankets for nearly half a century.

RESPECT

RESPECT The collection of fibres purchased by Brun de Vian-Tiran is carried out with respect for the animals and for the involved animal populations.

ENVIRONNEMENT

ENVIRONMENT The manufacturing of Brun de Vian-Tiran products is undertaken with full respect for nature, in particular for the river Sorgue which has applied pure water and the necessary energy for its fabric finishing since 1808.

SPECIALIST IN NATURAL FIBRES

BABY ALPACA, BABY LLAMA & ALPACA

WEALTH OF THE INCA HERITAGE

These Camelidae were left to us by the Inca civilisation and come from the Lake Titicaca region, 4000 metres high, between Bolivia and Peru. The Llama and the Alpaca are domesticated, raised as beasts of burden and provide milk, meat, leather and wool. Soapy soft, Alpaca gives the widest known variety

of natural colours: at least twenty-two shades are listed by the merchants of Arequipa.

CASHMERE

SUMPTUOUS

The Cashmere goat has one of the finest, and also one of the most famous, fleeces. From the beginning of the XIXth Century, the French Royal and Central Agriculture Society recognised this breed's special identity. According to old records, it was often called "downy goat" or "Tibetan goat", and found "throughout Asia,

from the Volga to the Gortopp, at the Kirghiz and the Kalmucks, and further East, finally in all the countries under the Llama religion". Today's name is based on the Kashmir province in India, and these goats are mainly raised in Iran and in Central Asia: China (Xingjiang, Tibet), Mongolia... They live at altitudes of 4000 to 6000 metres and to protect them from the cold an extremely fine protective down develops under their rough outer fleece. We choose it for its lightness and complete softness.

CASHGORA

TRULY RARE

Cashgora is a crossbreed of Cashmere and Angora (Mohair) goats. Brun de Vian-Tiran was chosen by the New Zealand breeders association to create the ultimate Cashgora blanket. The dazzling natural white of Mohair and the softness of Cashmere.

YAK

A TOUCH OF THE EXOTIC

Asian cousin of our bovines, the Yak lives on the slopes of the Himalayas at about 4000 metres, in Central Asia, Mongolia, Kirgizistan, Tadzikistan... Raised as a beast of burden and for its meat and milk, it is a very docile and placid animal which drops its fleece in an

annual moult. Our articles in Yak are available exclusively in natural brown and blond colors.

COTTON

SUMMER WELL-BEING

The properties of this natural vegetal fibre are very well-adapted to hot spells, and in particular to humid summers.

LINEN REFINED COOLNESS

Linen is a noble natural fibre produced from a plant which undergoes a long meticulous preparation: retting, stripping... Easily recognisable among all others, its contact gives an immediate sensation of well-being in summer.

SILK SOFTNESS & COMFORT

Textil fibre with animal origin, the Tussah silk comes from the Anthraeae perni, silkworm, that eats oaks trees from China, Japan and India. The Tussah silk has a soft handle and an incomparable insulating power. The lightest silk, it contains micro air bubbles that permit a better insulation. Coming from China via the Silk Road, the silk bring warmth during the winter and softness in summer.

GOOSE DOWN

TOTAL COMFORT (Eolienne duvets, Brun de Vian-Tiran's patent)

Goose down, exceptionally light, combines warmth, comfort and lightness. Arles Merino wool, easy-breathing and evenly spread, ensures a healthy microclimate for the sleeper.

COMFORT AS DEFINED BY BRUN DE VIAN-TIRAN

From  to  below, we give the article's performance indexes according to comfort criteria

	THERMAL COMFORT	The blanket's ability to maintain the body's heat. This is the adiathermic capacity.
	PHYSIOLOGICAL COMFORT	The blanket's ability to eliminate excessive humidity. For the body to be able to breathe, a healthy warmth is necessary.
	THE FEEL	The first contact, revealing the fibre's essence... and the blanket maker's talent; from a dry, firm shetland to the softest of cashmeres... Brun de Vian-Tiran satisfies all preferences.
	LIGHTNESS	BRUN DE VIAN-TIRAN offers you duvets and blankets in weights from 200 to 700 g/m ² . BRUN DE VIAN-TIRAN products satisfy all needs, in every season.
	PUFFINESS	Gives warmth and comfort. Results from the choice of fibre and of manufacturing process.

THE CHOICE OF THE DIMENSIONS

> GENERAL RULE FOR YOUR BLANKET'S DIMENSIONS:

For a mattress of normal thickness (20 to 25 cm) allow:

- 80 cm more to tuck in the sides,
- 40 cm more to tuck in the foot of the bed.

e.g. for a bed 180 cm wide and 200 cm long, allow:

- $180 + 80 = 260$ cm in width,
- $200 + 40 = 240$ cm in length.

A 240 x 260 cm blanket should fit perfectly. Other dimensions close to 240 x 260 (for example 230 x 250, 240 x 280) could also fit well.

> GENERAL RULE FOR YOUR DUVET'S DIMENSIONS:

A duvet is not tucked in, but for perfect comfort it must overlap far enough on the sides and the foot of the bed to protect you well from the cold. The rule for the choice of the duvet's dimensions is therefore the same as for a blanket.

> SPECIAL SIZES: please consult us.

PRESTIGE FINISHINGS

Merino trim, hand-sewn hems, extra-large sizes... our wool craftsmen can meet special requests. Please contact your retailer.
